High 5 for Mom & Baby

Cara Gerhardt RN IBCLC
## Ten Hospital Practices for Successful Breastfeeding

1. Facility will have a written maternity care and infant feeding policy that addresses all ten High 5 for Mom & Baby practices supporting breastfeeding

2. Facility will maintain staff competency in lactation support

3. All pregnant women will receive information and instruction on breastfeeding

4. Assure immediate and sustained skin-to-skin contact between mother and baby after birth

5. All families will receive individualized infant feeding counseling

6. Give newborn infants no food or drink other than breastmilk unless medically indicated

7. Practice “rooming in” - allow mothers and infants to remain together 24 hours a day

8. Families will be encouraged to feed their babies when the baby exhibits feeding cues, regardless of feeding methods

9. Give no pacifiers or artificial nipples to breastfeeding infants

10. Provide mothers options for breastfeeding support in the community (such as a telephone number, walk-in clinic information, support groups, etc.) upon discharge
Earning High 5 Recognition

Kansas Ranks 9th in the Nation
% of infants exclusively breastfed through 6 mo.

Kansas – 32%
Kansas Ranks 15th in the Nation
% of infants breastfed at 12 months

Kansas – 38.5%

† Breastfed at 12 months is defined as breastfeeding to any extent with or without the addition of complementary liquids or solids.
†† Breastfeeding rates through 2008 births are based on the National Immunization Survey’s landline sampling frame. Starting with 2009 births, rates are based on the National Immunization Survey’s dual-frame sample that includes respondents surveyed on landline or cellular telephones. If you would like more information about the sampling methodology and the impact of adding a sample of cellular telephone respondents to the National Immunization Survey, you can visit https://www.cdc.gov/breastfeeding/data/nis_data/survey_methods.htm.
†‡ Only breastfeeding rates based on a dual-frame sample that includes respondents surveyed on landline or cellular telephones are included in trend graphics. If you would like more information about the sampling methodology and the impact of adding a sample of cellular telephone respondents to the National Immunization Survey, you can visit https://www.cdc.gov/breastfeeding/data/nis_data/survey_methods.htm.

High 5 for Mom & Baby is committed to helping birthing facilities as they identify areas for improvement in breastfeeding support.

- Discussion and collaboration with fellow High 5 for Mom & Baby facilities
- Continued support through education
- Policy development
- Collaboration with programs that provide support and education to the birthing family and staff caring for them
Hospital Breastfeeding/Infant-Feeding Policy Checklist

The ten High 5 for Mom & Baby practices are based on the WHO/UNICEF Ten Steps to Successful Breastfeeding, evidence-based practices proven to increase breastfeeding success and reduce racial and ethnic disparities.

Note: Hospital policy is not required to address every item on this checklist but should cover most of them.

Step 1: Facility will have a written maternity care and infant feeding policy addressing the High 5 for Mom & Baby practices supporting breastfeeding.

- Policy supports all 10 High 5 for Mom & Baby practices
- All staff are responsible for maternity care policy and are familiar with its contents

Step 2: Facility will maintain staff competency in lactation support.

- All maternity care staff complete training in breastfeeding and lactation management (using Kansas Breastfeeding Education on the KS Train platform or similar/comparable staff education)
- All new staff complete lactation education within 6 months of hire

Step 3: All pregnant women will receive information and instruction on breastfeeding.

- All pregnant women are informed of basic breastfeeding management and care practices
- Facility supports breastfeeding employees by providing reasonable break time and a private, safe place to express milk close to their workplace

Step 4: Ensure immediate and sustained skin-to-skin contact between mother and baby after birth.

- Babies are placed skin to skin immediately after vaginal delivery if medically stable
- Babies are placed skin to skin as soon as both mom and baby are medically stable after a C-section delivery
- Babies remain skin to skin until after the first feeding when breastfeeding is desired

Step 5: All families will receive individualized infant feeding counseling.

- Breastfeeding families receive individualized teaching on feeding cues, positioning and latch, and how to tell that baby is getting enough to eat
- Families choose not to breastfeed receive appropriate education on formula preparation and feeding

Step 6: Give newborn infants no food or drink other than breastmilk unless medically indicated

- Breastfeeding babies receive breastmilk only unless ordered due to medical necessity
- Any reasons for supplementation are clearly documented
- Breastfeeding mothers are taught hand expression

Step 7: Practice rooming-in – allow mothers and infants to remain together 24 hours a day

- Education on the benefits of rooming-in is provided to all families
- Babies room in with the mother, including at night and during routine care by hospital staff

Step 8: Families will be encouraged to feed their babies when the baby exhibits feeding cues, regardless of feeding methods.

- All families, regardless of feeding method, are taught to recognize hunger cues
- Babies are fed 8 or more times in 24 hours, without restriction on feeding length or frequency
- Mothers who are separated from their infants are educated on expressing their milk appropriately

Step 9: Give no pacifiers or artificial nipples to breastfeeding infants

- Breastfeeding babies are not offered pacifiers or artificial nipples
- Families are educated on milk production and encouraged to feed frequently

Step 10: Provide mothers options for breastfeeding support in the community (such as telephone number walk-in clinic information, support groups, etc.) upon discharge.

- Families are provided information regarding where to access help and support with breastfeeding following discharge from the hospital

Maximizing the support and education we offer:

- Prenatal clinic collaboration
- Hospital caregiver education
- Postpartum plan
Lactation support may be the first contact for a postpartum person following discharge.
